In 2007, Autodesk introduced the two-tier, consumer-level AutoCAD LT for smaller businesses and the single-tier, professional-level AutoCAD LT Pro for larger companies. Autodesk also introduced the three-tier, premium-level AutoCAD Designer in 2009, which is a bridge between the desktop AutoCAD LT and the cloud-based AutoCAD LT/RPS. History AutoCAD has undergone several major redesigns throughout its history. The first version, AutoCAD 1, was created by Bernie Tranter and his son Michael in 1982 at the University of Chicago's Illinois Center for the Study of Computer-Aided Design. The program first shipped in early 1983. It was offered for the CP/M operating system for the IBM PC, among others. The second version of AutoCAD was AutoCAD II, which was released in 1986, and was available for the following operating systems: DOS, Windows 3.x and Windows 95. Autodesk acquired AutoCAD's developer, Cadd Inc., on September 26, 1993. AutoCAD IV was released in 1994, followed by AutoCAD V in 1995. In 1998, Autodesk released AutoCAD 2000, which became the last major revision of the basic AutoCAD release. AutoCAD 2007 and its successor AutoCAD 2009 came with extensive feature and usability upgrades. In 2007, Autodesk announced the introduction of AutoCAD LT, a new product line that offered the AutoCAD feature set for use in smaller companies and organizations, and in 2009, the AutoCAD LT 2007 product was renamed AutoCAD LT 2010. AutoCAD LT 2009 was discontinued on January 31, 2011, and AutoCAD LT 2010 was discontinued on June 30, 2011. Legacy Prior to version 2004, there was no native version of AutoCAD available for Microsoft Windows and no official version available for Mac OS X. In the early 2000s, Autodesk released a version of AutoCAD for the Microsoft Windows platform as part of the new "Autocad" branding. In 2004, Autodesk discontinued this version of AutoCAD. The discontinued version of AutoCAD was ported to the Mac OS X platform, called AutoCAD LT. Autodesk's graphics product line is continuing to expand with new offerings such as AutoCAD Architecture. Q: SQL Union between two queries I have to run two queries in a sql statement and they have to look like this: select id from users union all select id from user_relationships Is there a way to do that, or do I have to use the other approach? A: select id from (select id from users union all select id from user_relationships) SELECT will work here A: Try this (SQL Server syntax): select id from users UNION select id from user_relationships And, yes, it's true that UNION ALL can be much faster than UNION, as the latter has to be pretty much equivalent to (IMO): select id from users where id not in (select id from user_relationships) And, in fact, if you are guaranteed that the data in user_relationships is not duplicated, you can do: select id from users where id not in (select id from user_relationships) union all select id from user_relationships 3 2 .
