These can be used alone or together to create 2D, 3D and architectural drawings respectively. The AutoCAD component itself is the first release to use the object-oriented Visual LISP language, for example the command ls is a list of objects rather than a string list, as it was in earlier releases. It was a version free update for users of AutoCAD 2008 and AutoCAD LT 2009. The first version to be available in a free version was AutoCAD 2011, which is still available today. Autocad 2015 features new object types for the AutoCAD Map 3D component, such as: DXF Method – creates a method in DXF that is a signed rectangle, line, arc or polyline DXF Location – creates a new DXF location from two other locations DXF Named Dimension – creates a named dimension from two other dimensions DXF XY 5b5f913d15
