```

Getting repeat when setting two functions by using `promise_mac(with $.ajax,...)` I have a problem with accessing ajax function. 1) first I use the `promise_$(...)` (the category is good answer if you got the problem) function to get data from ajax (the function will be given below) 2) then I need to use the data when I define a function, for example: `function test($data){ return $data; }` but it turns out that the `$.ajax` function just query the data in the local server, I need to query the data from ajax interface which is a remote server, how can I

do that? sample: `function test($data){ return
$data; }`
