#### What's New In Portable Dirhtml?

dirhtml is a simple and easy to use tool that automatically creates HTML files from directories. It includes a wide variety of helpful features that are easy to configure and understand. For example, you can select the files and folders you want to include and exclude from the HTML output, as well as set an anchor prefix and customize the layout. You can even sort the files by default words or file size. The list of scripts in dirhtml are very helpful in editing the default appearance of the output HTML. You can configure the output according to your preferences and make it look better or different from the

---

default appearance. dirhtml is also a very useful tool in SEO (Search Engine Optimization), because it will help you create a HTML file with important files in the desired order that can help you optimize your web page better. Features: Create a detailed index of files and folders - be it from any directory. Support for recursion - in case you don't want to exclude any folders. Supports large file sizes and supports displaying the last modification date. Display only date modified or size for maximum compatibility. List files based on extensions, date modified, size, sub-folders and sub-folders. Create HTML file with links (anchor prefix) - hyperlink folders to the content. Options to modify the

---

appearance of HTML file (sorting by extension, date modified, folder structure, file size, number of words, default anchor prefix, date modified display, etc.). Goto parent folder for specified file. Create folder table for sub-folder files. Support for reading file size and date modified from Windows Registry. Support for sorting files according to date modified, file size, and other criteria. Supports sorting by date modified and file size. Supports browsing for any number of folders. Supports creating FTP or SFTP files, PULL FTP files. Supports copying the index to the clipboard. Supports setting the default encoding as UTF-8. Supports setting the maximum size of file. Supports using CTRL+ENTER to open current

---

directory. Supports using CTRL+TAB to go to a specific folder. Supports using CTRL+T to open a blank document. Supports using CTRL+W to close dirhtml. Supports inserting a table with count of files in each folder. Supports using CTRL+SHIFT+W to open a blank document. Supports using CTRL+SHIFT+T to open a blank document. Supports using CTRL+M to open a blank document. Supports using CTRL+V to paste from clipboard. Supports using CTRL+SHIFT+S to save HTML file to folder. Supports using CTRL+R to reload the table. Supports using CTRL+J to jump to the last index. Supports using CTRL+K to jump
