Pixumentarium is an XAP file, it may be installed on the Desktop of any user but it should not be placed in Program Files. First of all, you need to gain access to the program's official website and download the trial version. Go to the Download page and download the file (named Pixumentarium.exe, in our case) that is compatible with your computer. As soon as you have finished the download process,

launch it and follow the instructions. The program will load to let you get acquainted with its presentation. You will then be able to access the File menu, where you will have the choice to add or remove or change the name of the folders in the main program folder. The trial version of the software allows you to look through the file and folder structure, to have a first look, however you can't open any files, create or edit them or even view their data. However, you can also install this app without taking the time to create an account. What is Pixumentarium?
