What's New In MP3 EZlib Music Library Playlist Manager?

I searched several forums and asked several questions and none of the responses I received seemed to address my needs. I would like to create a new, free, music library in which all files are MP3s. I would like to be able to perform a query on all files or a subset of the files within the music library. I would like to use the Tag for the data. Lastly, I would like to display it on my screen like any other music library, with: 1. the ability to sort by Title or Artist. 2. the ability to sort by Rating. 3. the ability to sort by Title, Rating or Artist. 4. the ability to display comments and/or lyrics (only available for a subset of files). 5. I would like to create a playlist with the songs that meet my filtering criteria. I have no idea how to query a library, filter the tags, sort the files, maintain a playlist and have the options to sort by Title, Rating, Artist, or whatever else I may choose. I am a beginner, and my level of knowledge ranges anywhere from novice to expert. If anyone has a library created in MP3 with the capabilities I have mentioned, then I would appreciate your help. If not, then I thank you for your time. A: I solved this problem by using SharpEZ. It is an excellent library. It's FREE and has unlimited tags. If you want to create a Music Library that has unlimited tags, then SharpEZ is the way to go. It is very easy to use.
