The ELDEN RING is a fantasy action RPG from The BEASTs featuring an open world with quests and

battles. It features many elements of the game series, such as a powerful action system. The game takes place in a large open world. As the main character, you will join the world of Elden, an ancient kingdom. As you go, you will meet other characters, such as a young boy who is guiding you, a young princess who was stolen away by the monsters, and many other surprises. In addition to combat, there are elements of role-playing games, such as menu navigation, which allows you to freely change equipment and skill. You can freely change your equipment and skill. Change your equipment and skill to decide what kind of Tarnished you become.

GRAPHICS The 3D open world is a beautiful backdrop. A wide variety of landscapes and towns, set in a vivid world, are beautifully depicted. Among the many towns, there are also large dungeons in which you have to deal with various challenges.

CAMPAIGN In addition to the open world where you battle monsters, there are various quests scattered throughout the world. As you complete the quests, your friends will have you battle their monsters as allies. There are two of you in a party that is compatible with

each other, and this compatibility also applies to the multiplayer elements. In battle, the Tarnished you have equipped will be used to deal damage to the enemies. Depending on the stat of Tarnished, you can choose to use powerful attacks. With your Tarnished, you will be able to take on stronger monsters and bosses. In addition to battles with the monsters, you will meet people on the journey. Some of them are NPCs, while others are important people who are guiding you. There are also non-player characters who are waiting for you at the crossroads.

EQUIPMENT During combat, you can freely change your equipment as you like. Make the equipment better by equipping gear and magic that you acquire from battles. You can easily change your equipment with the menu, and the equipment will reflect your Tarnished.

THE BEASTs (game producers) The BEASTs consist of 15 employees, divided into two teams, and we have a lot of experience producing games. We have worked together to make games and started to make our own games back in 2007. Our games include Monster Hunter, which is a game we released in 2009 and SIN

Adventure

In the Lands Between, three guilds of nobles, each with their own culture and purpose, offer different types of adventure to you. This rich background, one that takes place in a drama filled with action, is the biggest strength of the game.

■ **In the Golden Elder Lands, a guild called the Warrior is fighting against the Tarnished, while the Wizard and Shadow are sent to investigate, but a Tarnished has invaded their castle.**

■ **In the Silver Elder Lands, the maiden of the north is joining a guild called the Vampire, and the champion of the north is struggling for power.**

■ **In the Elder Lands, as darkness spreads**

Quote from: man of shadowandfire on September 17, 2012, 02:50:31 AM Tarnished, what you said is just bullsh*t. Its insulting to the person who put more than two months of their time into the game. It also doesn't tell the whole story about Tarnished. He really was a good person he just fell into a bad circumstance that really cheapened his self-worth. You havent played the game, you don't get to judge the person. I will say the same thing for the Hero's Story, it's a group of writers that's been together for the past 9 years but got together again and then wrote the story of the game. It's a good story but as you said, it's to long. I think the story has the potential to be a great one but it's not fully there. Thats just what the writer and developer duo are still working out. As you explore, the joy of discovering unknown and

overwhelming threats await you, leading to a high sense of accomplishment. That's not very good, that sounds terrible... I'm a big fan of RPG games. Q: Gap detection after sliding UIView on ios Hi I am having a problem with detecting if a sliding view is a gap. I have tried this method `CGRect end = self.sliderCmp.frame; // slideCompleteHandler` is the callback you receive when the sliding is completed, null // The issue is that with my design, this method will be called after the last view is displayed, therefore // `end.origin.y` is greater than the `end.size.height`. This is the callback which means that the slide is over. if `(end.size.height`
