“We are proud of the technology that we have developed. It will enable our players to be more accurate and effective in their skill actions and postures,” said Alex Jacques, Creative Director, Electronic Arts EA Canada. “This technology will add an entirely new dimension to the game, and when coupled with the new dynamic “Art of Possession” we aim to deliver unparalleled authenticity to this year’s game.”

Moving Player and Ball Physics – Using real-life physics and player models powered by motion capture data, moving players and the ball interact naturally on the pitch. Players can be more balanced in various poses, tackle animations can be more realistic, head shots can be applied more precisely, collisions and contact can be more precise, and the player can punch the ball with greater impact.

New Goalkeeper & Defenders – Players have a variety of new attack and counter-attack moves to outwit opponents. A ball-playing goalkeeper can also counterattack, making goalkeeper controls faster and more realistic. Defenders can also be aggressive with more wrestling and 1-vs-1 game opportunities.

Advanced Artificial Intelligence – AI will interact in a more natural way with the pitch, use new tactics and playstyles, and make soccer match-like decisions. AI will even prevent a player from escaping the field by constantly moving back to defend its own goal and also catch out a player out of position by feigning a shot. AI will also use advanced tactics, such as passing the ball to your teammates while defending, playing the long ball, and losing the ball.

Improved Match Observations, Comments, & Social Play - View the game in 4K HD or 6K Ultra HD as you watch your teammates perform, analyze, and react to the soccer in an enhanced avatar look.

FIFA Club Matches - The new Galaxies for Club Matches allow you to play a full 3-on-3 game against your fellow club owners. All new Pro Clubs – Each team has several stars, managers and assistant managers. You’ll compete for the best starting XI in the Attribute Match and a chance to get your pro team on the road to the World Cup!

New Goalkeeper Abilities - The new goalkeeper model also has a variety of new attacks. New skills include a diving kick and ability to bring down a corner. The revised Kick Option animation shows that goalkeepers can also have more control over where the ball is going
