Songs of the Pops Starship Expanse -  
According to McCaffrey Aiiieeeeeeeel put  
my video up on Reddit... did not expect  
this to happen. Although it seems to be  
a huge success, I'm glad of the slow  
reaction I received. I have heard some  
people tell me that they didn't like my  
song or my voice, even though it's the  
first time I've made a song I uploaded  
to YouTube. However, I'm quite ecstatic  
of the feedback I got. Y'all are awesome  
and I appreciate your honest feedback.

## What's new:

**Mystic Style 30 JUL/16 The twins got pretty much what they wanted when they made their move against Dr. Manicure: They got three of the Visionary's gauntlets and were able to bring their dead father along for the ride. Then again, it was a basically a foregone conclusion that this was what would happen. So they got what they wanted, and the two of them walked away. Okami and Cicada begin arming themselves. Izeola tells Okami that he really shouldn't burden himself with some kid he just picked up along the way like that. Okami replies that clearly she has just seen Xe. Xe is indeed in danger. She knew that Okami is an emperor, no? Xe's fate had a lot more at risk than just staying alive, and that was pretty obvious when she tried to escape. The battle has begun. Xe is being attacked by a trio of spider men, but at least one of them is Xe's Shukumei. So the real battle begins. Commissions for the twins, no doubt. If we have to invoke the Ninth Law of Belief to get that these kids go along with all this, then so be it. Xe runs out of the princess' room using the**

Beautiful game. Great graphics and design, Wonderful story line. The game seems to be clunky, slow and sometimes even crashes without warning. Description This post tells you all the reasons why Whislist won't be coming out anytime soon. I've been working on this game for over a year now, and I'm proud to say that it's finally almost ready for release. I've been through a lot of revision and re-revision, and I think the game is now ready for production. Whislist is about a

world in which technology has evolved to a point where we are able to 'do anything we want'. A post-apocalyptic future in which mankind decides to colonise the Solar system. The only thing that stops us from doing this is the fact that we have to remember to keep Earth clean and lush, or we have to move in to do it. Sci-fi with a twist. Features: -Game Engine is 20+ years old, and was created in a different era with vastly different computing power. -All programming is done using game logic. -All coding is done using a narrative writing system, and is

constantly being re-written to keep it interesting and to keep the player coming back for more. -Surprising amount of time and effort has gone into the game. -None of my future work will be based on this engine, and I have a lot of other projects on the go. What's done: -All voice actors have been recorded. -All scenes have been fully animated. -Almost all the music has been written or produced. -All art assets have been designed, drawn and sculpted. Who's behind it: -Myself -My friend Bart -My friend Kazu -And many more I'm a pretty busy guy right now,

---

I've got a tonne of things going on, and my focus is on these guys right now. Recently i have spend countless hours writing a mysterious story about a space traveler who must travel across a strange new world. He must find a way to stop his friends from being captured and killed by a rival. But sadly i decided to keep this secret for now as i want to reveal more about this story later, and make a demo of it to get feedback
