Today I had a problem, with my Samsung remote not working, but instead having changed to inputting my password (It doesn't show up as the screen getting password input). I found that there was nothing wrong with the remote device, and there was nothing wrong with the wireless network, because I was able to get it working. From there I knew that the.(void *p, void *const *b, int const *s) { fsel *f = (fsel *)p; return (((*f->all[0].a == *a) && (*f->all[0].b == *b)) && (*f->all[1].b == *b) && (*f->all[1].b
