Bitlocker (BitLocker Drive Encryption) is a hard disk encryption software manufactured and marketed by Microsoft that provides hardware-based disk encryption, also known as full drive encryption. Bitlocker was first introduced in Windows Vista in the summer of 2008. It was later extended to Windows 7 in April 2010. Bitlocker works by encrypting the entire disk partition while leaving the master boot record (MBR) and the operating system untouched. Bitlocker is made available for all versions of Windows from Windows XP Professional (all editions) to Windows 10 Professional. Bitlocker's BitLocker to Go feature is optimized for use with removable media, including flash drives, USB drives, and CDs. Drive encryption on USB flash drives can be set to expire after some time or number of write operations have been performed.
