973 So.2d 20 (2008) TAYLOR LOBEL LTD. COMPANY, a Florida Corporation, Appellant, v. Jack LEE, Plaintiff-Appellee, Jessica A. Phillips and Jose Lopez, Co-Defendants. No. 2D07-2818. District Court of Appeal of Florida, Second District. January 17, 2008. *21 Grant L. Kistner of Grant L. Kistner, P.A., St. Petersburg, for Appellant. Samantha A. Mason, St. Petersburg, for Appellee. FULMER, Judge. Taylor Lobel Ltd. Company ("Taylor") appeals the trial court's determination to allow plaintiff, Jack Lee, to amend his complaint to add Taylor as a defendant as well as its denial of Taylor's motion for judgment on the pleadings. We affirm the denial of Taylor's motion for judgment on the pleadings without discussion. We affirm the amendment of the complaint, however, because the addition of Taylor was not "clearly unsupported by the facts or by the applicable law." Florida Rule of Civil Procedure 1.190(a). "Whether to permit an amendment of pleadings is a matter committed to the discretion of the trial court, and the trial court's ruling will not be disturbed unless there has been a clear abuse of discretion." Eninger v. David, 863 So.2d 69, 71 (Fla. 2d DCA 2003). The addition of a new party is generally considered to be one of the last prerogatives of an already overburdened plaintiff. See Liggett Group, Inc. v. Engle, 696

So.2d 292, 302 (Fla. 3d DCA 1996). However, the appellate courts of Florida have a duty to do justice and prevent injustice. See *Foster v. Accumacare of New Smyrna Beach*,

What's new:

Armageddon Worms Armageddon is an isometric third-person multiplayer online tactical shooting game developed by Danish studio Team17. Set in the science fiction world of Adams in which invading aliens, known as Worms, have turned much of the human population into monsters, the game was first released for Microsoft Windows, PlayStation 3 and Xbox 360 in August 2007 and on iOS, Nintendo DS and Amazon Kindle Fire mobile devices in 2008. Versions for PlayStation Portable and PlayStation 2 would follow. Worms Armageddon has received acclaim from critics since its release. The game was the first on Steam to surpass \$1 million in revenue before release and has remained in the top 25 grossing games on the service since. It spawned a series of tie-in merchandise, including video games, toys, collectible figurines and novels. Gameplay Worms Armageddon is a multiplayer isometric third-person arena game similar to Team17's previous Worms game Worms World Party (July 2006). The game combines gameplay aspects of an "arcade-style" shooter and an "action-adventure" game. Bullets are labeled on the map with the intended target. Players can pick up, throw, or put down weapons to direct the bullets. If the game detects an abrupt change of direction the player is tipped over or a bullet damages a vehicle. Worms cannot be spawned outside of a playable area; the map's size is restricted to a smaller area referred to as a "Lobby". Worms are placed through the use of special markers, a worm variant called wrecks, or a map editor. The ground, which represents the protagonist's main weapons, can be either flat or slope, which affects how the player moves. Slope is useful for long range maneuvers, where as a flat surface may offer a faster speed, better maneuverability, and more cover. Flat ground surfaces also normally result in fewer wormholes to the player, thus making the game less dynamic. Real-life physics are applied to most environments, such as falling and rotating. The player's main weapons are the Plasmodium Flechette Rifles; the starting weapon for each level is randomly given, along with three other standard weapons available to purchase. The weapon system has three levels of modulation, beginning with the base weapon, and can be customized with the widely available powerups; ammunition capacity, rate of fire and damage modifiers. Damage mechanisms in the game include health, fuel, or ammunition. Health drains quickly when exposed to fire
