Some things I must add, I have some transition effects that don't work, I have no idea how to fix that. Is there a way to simplify the animation somehow? It looks like 4 clips are too long to animate for the scene. They are basically 2 circles that are split in 2 halves, that part itself looks great. The circles are about 700 x 700 pixels each, you can still see them in full in the layer panel. Thank you very much for taking your time on this, they are worth an upload :). Thank you very much in advance.

Crystal structure of the P1 'cage' in RNase PH5L2 reveals a protein conformation similar to the bacterial PNPase with and without nuclease activity. Polynucleotide phosphorylase (PNPase) is an important enzyme that catalyzes the hydrolysis of polynucleotides to monophosphorylated nucleotides and pyrophosphate. PNPases have been classified into two groups: PNPases with and without nuclease activity (PNPase-NA and PNPase-NA, respectively). PNPases play critical roles in various cellular processes and in particular in the intracellular mononucleotide pool. Here we report the crystal structure of the P1 'cage' in the PNPase-NA homolog from the bacterium *Thermus thermophilus* and the active site of the PNPase with nuclease activity from *Methylococcus capsulatus* (MtPNPase). In the PNPase-NA homolog, the phosphate-binding 'cage' corresponds to a loop region that inserts into the active site between a dimer interface and the zinc-binding loop, while in the PNPase the phosphorolytic activity resides in a loop that interacts with the zinc-binding loop. Furthermore, the active site of the PNPase with nuclease activity is structurally different from that of the PNPase-NA homolog, which suggests that these enzymes have different substrate specificity.

Culadro-Macedonio Patricio Culadro-Macedonio Patricio (July 18, 1883 - June 9, 1943) was an Indonesian politician of Batak descent and a writer. His father was a native of the Batak people, and his mother was a Chinese immigrant. He initially spent most of his career in education, at the Batak Kali college for
