At its core, a Fantasy Online RPG. With a vast world, multiple characters, and a multitude of gameplay elements, we also feel the need to create a game that will appeal to a wide audience. As a result, the overall design of the game is more accessible to newcomers and, to the extent possible, the game is intended to be less complicated than many contemporary role-playing games.

ABOUT TARNISHED PROJECT: The name Tarnished, an old and derelict place in the middle of nowhere, is synonymous with unbridled magic. But it is in this blighted town that the malicious spirits and undead monsters that dwell in the Netherworld invade the material world and have over the centuries taken a more tangible form of existence. The townsfolk who have gradually become used to this state of affairs have come to recognize these intruders as pale shadows drifting through the darkness in the form of armies, and live in peace with them. However, the situation is about to change. In the far west, a new spring has arrived and the people are beginning to take notice of its wonders. To restore the magic that is no longer there, the people of Tarnished require a guardian who can maintain order among the populace and protect the town from the influx of strange beings who have suddenly appeared.

Fantasy action RPG, version 3.1

1. UI is separated into two different sections.
- 2. The Map Screen is a slideshow of your friends who are currently online, but not in the World of Tarnished.
- 3. The World Map screen is the main interface.

2. TO LOCATE YOUR PARTNER. The number of players in the World of Tarnished is limited to 7. You can find out more about the number of players by accessing the Map At the bottom of the Map, there is a "GO" button. Click it and you can see each of your partner's information and details on the Map.

3. INTERACTIONS WITH OTHERS IN THE WORLD OF TARNISHED. You can identify the online status, ability, character, equipment, etc. You can take each of these online actions.

1. When you click a player's name, their information will be displayed.
- 2. You can

What's new in Elden Ring:

-- Description from MobyGames I took this off of my girlfriends car. I took some before and after shots using the camera. The car was running and no pictures were taken. I was able to take a couple shots before showing her this one. I have no idea whats causing this, wish I did just a little more research, but the car is doing well. I am writing this in direct proximity to the Prairie Island National Wildlife Refuge, so I have the distinct honor to live amongst the mighty dinosaur gallery. For today, in a thankful heart I acknowledge: The beauty of shared, inclusive humanity - the richness of your life and your outlook. Thank you for your honesty and wit, and humility... Thank you for the good times, the bad times and all of the in-betweens. Thank you for adding new colour to this part of my life.

Re-jointering: A rough working process consisting of scraping the blade closer to its point and swiping it upward. Used for reshaping the blade.

Bleeder: A naturally occurring process in the steel used to temper the blade. It is caused by the gradual but relentless escape of small amounts of steel from the blade during the tempering process. Features of a blade with a bleeding edge are reduced flexibility and increased cutting speeds. Melted steel is also sometimes seen forming a malformed groove at the edge of the blade.

Fort Boyard: The day I almost died. Saved by the heavens. A game I somehow got a perfectly timed parry. All during the course of the battle, I was shouting "I don't play with girls!" to the tee-totaling tanker who was beating my ass.

Fresh off the bay: A bit of a theme in this posting. Almost everyone I know, whether they share my passion or not, has a fresh sharpening technique or procedure to teach. This being one of my more senior blades (a R&R Chiavari #3) I ran it out of oil during the break-in the other day. While oiling the blade, I happened to jiggle the head back and forth to get the "has a good relationship with gravity" angle right. This was immediately followed by what felt like a pleasant surprise. The edge started to look like it used to, crisp and fine. I was so surprised I spent the next 10 minutes jiggling the hilt back and forth, slowing picking up more satisfaction
