Rollers of the Realm is a time-gap fantasy, with a strong focus on story and character. The land of Eredin is awash in a bloody conflict between the Order of the Last War and a fanatical brotherhood of the society "Fratres Dominus". The task of the players will be to attempt to track down and vanquish the Fore-Princes of the Fratres Dominus and their corrupted followers. What's New: New Visuals for the Settler, wizard, and fighter races for the game.A new special race, which will be added to the game once the Steam Early Access is closed. What's Next: This early access will be the start of a complete release, consisting of a single huge map, many new ships and vehicle units, new miniatures sets, many new buildings, buildings with expanded functionality, all of these units will also be available on Steam. Upcoming Projects: There are many other projects and ideas for the development of Rollers of the Realm, which I will be able to present in the coming years. ==================== Release Notes: The Steam Early Access has begun on the 29th of January 2017. ==================== Please be aware that this release is not meant to be the final game. I will keep releasing content while the game is played in early access. ==================== The release will include a 32-page manual with game rules, an extended help file for the game itself, eight amazing scale miniatures, in addition to the excellent faction-specific expansion sets that I will be releasing during this Early Access period. In addition to this, I will keep releasing all of the planned content during this development period.5 / 4 , - 5 / 3 , - 5 , 2 . 7 6 , - 2 / 1 1 , 0 . 0 6 ? 2 . 7 6 W h i c h i s t h e s e c o n d b i g g e s t v a l u e ? In the Plus Point, you get an 8 x 4 grid of numbers. When they appear in the game, you get 3 seconds to click on them in the right way. If you click on the same number multiple times in a row, it will build up a sequence. Every sequence you form will get the sequence you clicked next to it. It is the sequence that determines what you'll have to use in the next level. For example: If you get 3, 2, 4, 5, 9, 6, it means you will be working with those numbers in the next level. You'll have to combine them into sequences like 7, 8, 9 or 11, 8, 12, etc. Those are the only rules that you need to know to pass each level. There are 5 levels in the game. Each level consists of 3 bonus stages with "Minigames" that test your ability to create sequences. There are both single sequences and sequences with multiple numbers that the player has to combine. Once you pass the first 3 bonus stages, you'll be ready for the first main stage. There are 14 of them, so they will take you more than 15 minutes. A timer makes sure that you get through all stages fast. There is an option to rewind the time to stop the timer from going off. After the game ends, you'll get the best results and your score will be shown in big numbers. Also, a bonus time is shown - so the best time to try out your new skills.There are some very handy options in the game - the speed of the numbers, showing or hiding the next sequence, the Minigame rewind and speed options. All of those will make your game experience that much better. The graphics in this game are unique and pretty satisfying, showing numbers and sequences. You have the possibility to control the game speed, an option to see only the sequence you'll have to combine or to hide them and an option to see both the sequences you have to combine and those that are left. The Plus Point was made by Kindella Design in cooperation with FaceyGames. It's available in German, Czech, Polish and Russian. The second game on this list of our best puzzle games for kids is Super Dot. It's about as exciting as it sounds - you have a dot, a big dot and a little dot. All three of them are bouncing around the screen. And you have to click on the dot that is to the left or to

: What the...? Hello, this is Antonio R. Gutierrez Jr. and you are reading BRAVE PINBALL, the first novel that I have written. Here is a excerpt of the novel. There is in our universe the such thing as magic, and it's not something to be relished, as innocent as a cool breeze on a hot day. Unless you have a very twisted life experience, you'd say that magic is something to be feared, not to be celebrated and to be coddled like a baby. I, too, thought magic was something that only the evil or sadistic would need to maim or kill. If any ordinary person even remotely associated with magic was exposed, let alone knew anything about magic, they'd be tried for treason, or trying to destroy the very fabric of our universe, or some such nonsense. I don't know if all of that is true, but it certainly seems to be the case. Like Frankenstein's monster, the man who makes the magic is an abomination, an outsider of society, but he gets away with it because all of his attacks are hidden and his death is attributed to a lawsuit or investigation. For the man who made the magic, a black cloud hangs over him, he is just a specter from which another homicide may soon arrive. And the homicide that is always following in his footsteps will defend him. This reality now hangs over my head. Despite all of that, I'll tell you about Rehaka, the goddess of magic. She is the guardian of the sacred temple I received my training in and one of the greatest friends of the Watcher. I'll tell you about Rehaka, who once and for all defeated an ancient warlord named Mobendo. That was before the secret war began with the cult of the big evil DOLL, and though I'll tell you all about that later, it's a long story, and many things have happened in between. So, without further ado, let's begin. Three years ago What started the Master's ordeal was that his daughter had a son, but he's very sick. He didn't want a son with a high chance of dying and passing his affliction on to other members of his family so, he sacrificed his daughter in his religious rituals. That way, her son
