Works with latest Video for Windows 7, 8, 9, 10, Vista, XP, 7. President Obama signed his first executive order for his new czar - to "free the Internet." Here's a reality check to help Obama understand just how hopeless his jobs plan really is. In a video released on the White House's website yesterday, President Obama introduced a new government "czar" to take charge of implementing his jobs plan. But the fact is, Obama's plan won't create any jobs until he delivers a recovery plan, and that one is long overdue. So how does a new "czar" improve matters? To be fair, Obama has decided to "create one" at last because the economy is sputtering along with a pathetic 2.6 percent growth rate. Actually, the economy is slowing down to a point where some economists suggest we might miss the official, government 3 percent growth rate by the time 2011 ends. Last summer, when the economy began

The court ruled in January that guitarist Randy Blythe could be extradited to the country, where he faces charges of culpable assault. The US-born musician acted in a film about the incident. Blythe denies the claims and says he was acting as a citizen journalist. Blythe's defence lawyer told Czech media that the 30-year-old claimed he suffered from "post-traumatic shock" after witnessing the rape at the same time as the incident in 2010. The Czech court's decision to extradite Blythe is being appealed at the European Court of Human Rights. image copyright Getty Images image caption Randy Blythe acted in the film about his rapes,

Tomboy, which went

hidrocystoma: a case report. Apocrine
hidrocystoma (AH) is an uncommon benign
epithelial cystic lesion, derived from the eccrine
ducts, most frequently seen in the periocular
regions. We present a case of periocular AH in an
11-year-old girl, who had a large lesion with
yellowish, and black limbal nodules on the lower
eyelid. An excisional biopsy and histological
examination were performed. The results were
consistent with the diagnosis of AH. We excluded a
malignant lesion by immunohistochemistry using
anti-Ki-67 and anti-p53 monoclonal antibodies. AH
is a benign tumour, usually unilateral, of the
