1. Display the Adobe website on your browser. If you have an Internet Explorer browser on your computer, go to `www.adobe.com` and follow the website instructions to open the site. You might want to create a shortcut on your desktop for the site in case you want to open it again. After you open the website, you see a sign-up page that asks for your email address. Leave this page open on your browser window so that you can access it later. 2. To gain access to tutorials and help resources, you need to join the Creative Cloud or Creative Suite. After you purchase your software, access the tutorials by clicking the Tutorial link located on the bottom-left corner of the website and then click the Join link that appears there. 3. After you have signed up for the Creative Cloud, go to the CS5 Application tab and use your cursor to highlight a tutorial: CS5 Tutorials. Figure 5-9 shows the website homepage and the Creative Cloud tutorials for CS5. Figure 5-9: Adobe has an extensive website that provides tutorials and information for users of the Photoshop application. 4. You then see the Tutorials page, as shown in Figure 5-10. Figure 5-10: Tutorials overview. Photoshop has many helpful features, including features you don't usually think of as editing. But you can learn to use those tools and learn how to create layers and manipulate your images with them. The pages available at www.dummies.com/photoshop help you to become more familiar with layers and better understand this important tool. Here's an overview of some of the features you'll find: * Adobe Presets. There are 438 Presets that you can apply to a layer, each with a preset effect such as a cartoon style, typography, or watercolor. (More Presets are available at `www.dummies.com/go/photoshop`.) * Create a new layer. To create a new layer, click the Create a new layer button at the top of the Layers palette window. When you do so, the Layers palette window opens; click the New Layer button at the bottom of the Layers palette to open the Create a new layer dialog box. * Layer menu. Press `Ctrl+Alt+I/Shift+Ctrl+Alt+I/Shift+Alt+I` to open the Layer menu, where you can apply

5E may be a small app, but it includes many essential editing tools. It has a standard set of features to help you create stunning images. It has a minimalist approach but also has many useful features. Here are 5 essential Photoshop Elements editing features you need to make creative photos: 1. Adjust colour There are lots of colour effects in Photoshop Elements and each one of them can make your images look more interesting. You can control the lightness, saturation and hue of your images with just a few mouse clicks. The good news is that with Photoshop Elements you have access to over 10 built-in colour effects you can use to improve your photos. The bad news is that you have no idea which of the 10 effects work best with your photos. The Eye of Horus filter gives your image a warmer colour effect. It makes your photo look somewhat like a sunset or fireworks. It gives you a sun-flood effect. You can use it with any kind of photo. On the left side of your screen, you will find a list of the available filters. One filter is highlighted in the image below. You can view all the filters in the list by clicking the little tab above the filter name. When you click the little tab, it will show you all the available colours and shades to apply to the filter. These will be shown in the bottom-right corner of the window. You can also click the colour swatch to preview the colour. In the example below, the little tab is not shown because the colour is the default white. You can see the Eye of Horus filter in action on the right-hand side of this screen. If you drag the tiny handles on the left side of the window, you can adjust the saturation, the brightness and the hue. There are many colour effects available in Photoshop Elements. My favourites include: Sun-flood: Use this effect to give the sun a glowing effect. It makes your images look like they are actually a sunset or fireworks. Use this effect to give the sun a glowing effect. It makes your images look like they are actually a sunset or fireworks. Sun-shot: Use this effect to give your images a warm effect. It makes your images look like they were taken in the middle of a sunny day. Use this effect to give your images a warm effect. It makes your images look like they were taken in the middle of 05a79cecff

1. Field of the Invention The present invention relates to a mechanism for transmitting rotational power from an engine to a driving device, and particularly to an automatic transmission enabling easy operation by an operator. 2. Description of the Related Art A conventional automatic transmission for a passenger car is provided with a plurality of planetary gear sets or gear trains for selectively changing the transmission ratio, including an overdrive (OD) gear set. Such an automatic transmission changes the gears by controlling the gear trains including the overdrive gear set according to the operation mode selected. Moreover, the automatic transmission is provided with a control unit for calculating a gear train determining factor, for example, to determine whether or not the gear train should be changed to a gear train determined by the operation mode; comparing a target gear train determined according to the operation mode and the gear train determining factor; and determining whether the gear train should be changed. The gear train determining factor of a first transmission ratio corresponding to an EV (electric vehicle) mode is higher than that of a fourth transmission ratio corresponding to a fourth-gear mode. If the transmission ratio corresponding to the fourth-gear mode is changed to that of the first transmission ratio, a large engine torque is developed, causing excessive shock. Moreover, because the gear ratio corresponding to the first transmission ratio is set as an OD gear set, this leads to poor shift feeling. Therefore, in this case, the gear train is changed to the gear train corresponding to the fourth-gear mode to suppress the large engine torque so as not to cause excessive shock. In this case, if the operation mode corresponding to the fourth-gear mode is selected, the gear train determining factor for the fourth-gear mode is lower than that of the OD gear set. Therefore, the gear trains corresponding to the first transmission ratio and the fourth transmission ratio are determined to be changed to the first and the fourth-gear trains, respectively. In this case, however, the gear train corresponding to the second-gear mode is determined to be changed to the gear train corresponding to the first transmission ratio, and the gear train corresponding to the fifth-gear mode is determined to be changed to the gear train corresponding to the fourth-gear mode. In this case, the gear trains corresponding to the second-gear and the fifth-gear mode are determined to be changed to the first and the fourth-gear trains, respectively, thereby lowering the gear train determining factors. As a result, the ratio of the gear trains corresponding to the second-gear and the fifth-

Democratic presidential candidate and former Texas Rep. Beto O'Rourke told The Washington Post on Tuesday that he would use "any and all tools" available to him if elected president to dismantle the NRA. O'Rourke, a former Texas congressman, told the Post that he was in favor of a federal ban on assault rifles and that he's spoken to people who have been physically assaulted with guns. "I will not be able to make good on any campaign promise, any pledge to you, if I am not able to go to those lengths to try to make sure that the public safety is the number one priority in this country," O'Rourke said. ADVERTISEMENT O'Rourke says he's been informed by the family of victims of gun violence that they won't support him unless he promises to take on the NRA. "We are going to have conversations with people of all walks of life, backgrounds, ideological perspectives," he said, adding "I will take their input." The Hill has reached out to the NRA for comment. O'Rourke has already been outspoken about his views on guns. He told MSNBC's "Morning Joe" in August that he backed a ban on bump stocks and he spoke against a bill in the House that would require background checks on gun sales. The bill, which was opposed by the NRA, passed the House on Friday after it failed to pass in December. O'Rourke is polling in single digits in the presidential race with fewer than 10 percent of the vote, according to RealClearPolitics.Q: Dynamically added input in swift is not registering value from textField I have tried a few things but I'm not able to figure this out. The code below properly registers all the values that are inputted into the textFields even if the user is not the first to input anything into them, but the problem is, when the user types something into the textFields, it doesn't register the typing into the textField and just clears it in the next line like so: import UIKit class ViewController: UIViewController, UITextFieldDelegate { @IBOutlet weak var b1: UITextField! @
