I think this is a nice game. It's still fresh. It's still trying to find a niche in the market, but I think it is a good game. I think most of the flaws can be fixed with some more time and lots more people work on it. I like it because it is a fantasy world, for me, more than wow. It's pretty and it is old-school. More characters may be needed so I can use my attunement. Immersion: The graphics look old, but not too old and I like the graphics. I like the art style. I think it can get more interesting if more art is added and I think it would look better. I like the combat looks. I like the music. I like the basic game play of the spells. I like how it looks with a lot of world information. It looks pretty good. Story: I think the story is nice. There are some facts wrong in the game but it's pretty easy to overlook it. The story is not bad. I like the world. I love the graphics. It is a nice story. I love that you can make your own story. I love the way it looks. It is a nice world. Controls: I like how it controls. I like the lack of mouse control. The controls are good and I like the map of the game. I like how it is a rpg with a side scroller. I like the battle system. I like the melee combat. I like the customization. I like the spells. I like the ability to customize my game as I want. I like the way the game runs. I like how you can make your own story. I like how it's like you are living in a fantasy world. I like the story. I like the world. I like the way it looks. I like how it is basically a side scroller, but it's like you are doing a dungeon crawl. I think the leveling is good. The skills of the game are good. I think the combat is good. I like how the melee combat works. I like how the skills work. Overall: I like this game. I like how it runs. I like how it looks. I like how you can make your own story.
