This is an Addon for Savedata/Wizard as a whole. When clicked, it will show all currently saved data for the selected Rune Priest class. Currently available options are: 1st level/spells, 2nd level/spells, 4th level/spells. Options will be added as more are made available. Welcome to my sixth-sized model, the scorpion. The model itself is very straightforward. It has just enough details so as to make it look authentic and I'm quite pleased with it. It contains parts suitable for both Rodin and Final Fantasy games. It was made from OverSoul's Flight model, modified and translated to Game Maker. I have included a survey page at the top of this file so that you can leave feedback on the model. Feel free to use and modify this file for personal or non-commercial use! If you distribute the file, please give credit to me by citing this page as the source. I hope you find this useful, and hope to see your creation! Wish me luck! -+--+ [=]. ==++ Original model in.sm3 -- note: Model is NOT TRANSLATED to ALL Languages Version 2.0.8 It's a simple model with cel shaders for an anime blacksmith. The ability to model the eyes and mouth will be added later. It is missing some parts, with the intent of supporting many different anime characters. I have included instructions on how to adjust the body to fit different requirements. The proper way to color this would be to remove the models eyes to make them black, then adjust the colors for the eyes once complete. It is very simple to follow. You don't need to have the "Tile, Pixel, Curve Tools" to use this model, as you can use a standard item model converter and make a blacksmith from that converter without them. The model comes with instructions on how to convert the model to one that can be used for Tile, Pixel and Curve (). Modifying the model for use in Rodin is currently fairly simple, but I can't guarantee that I will add all the features that are requested. I plan on making more anime models so I'm not sure if there will be a lot of need for this particular model in the future, though I'm going to keep it on
